HARIKRISHNA ALUNGAL PRAKAS

alungalhari@gmail.com • +91 9847998632 • LinkedIn • Github
Website: alungalhari.vercel.app

Professional Summary

Motivated and meticulous Computer Science graduate with dual specialization in B.Sc. Data Science and M.Sc. Computer Science, with a strong passion for data science , software development, machine learning, and data-driven intelligent systems. Proficient in multiple programming languages, data analysis tools, and ML frameworks, with hands-on experience building, evaluating, and deploying software and data science projects . Seeking a challenging software development role that leverages both software engineering and data science expertise to build scalable, insight-driven solutions while enabling continuous professional growth and Exploring new teachnologies.

Education

M.S.c Computer Science | St. Joseph's University Bangalore 2024-2026

- Relevant Modules: Operating Systems and Computer Networks | Database Management Systems | Software Engineering and Advanced Programming | Artificial Intelligence and Machine Learning

B.S.c Data Science | Presidency University Bangalore 2021-2024

- Relevant Modules: Statistics and Mathematics for Data Science | Programming for Data Science(Python/R) | Database Systems and SQL | Machine learning Fundamentals | Data Visualization and Exploratory Data Analysis

Experience

Data Analytics Course and Internship | TEACHNOOK Pvt.Ltd. Bangalore Feb2024 – mar2024

- Conducted data analysis for datasets provided by the company
- Learned and worked by using tools such as Powerbi , Excel, Tableau

AI/ML Engineer Intern | UniQtx Telecom Solutions Pvt.Ltd. Bangalore Dec2026 –Mar2026

- Learned developing AI – powered voicebots using NLP
- Learned to work in company server and code using coding agents
- Learned to train , voice clone , fine tune the models (TTS , ASR)

Projects

Automated Classification of Mushroom as Edible or not Edible using ML Models | *Python(colab , vscode),Excel,ML Alogorithms*

- Perform segmentation of data to identify the edibility of the mushroom
- Critically analyze and review identification of poisonous mushroom using ML algorithms
- Implemented various models like knn , svm , random forest ,etc to best know the accuracies

Skills and Tools

- Data Analysis & Reporting
- Error detection and debugging
- Business analytics & Insights
- Problem-Solving & Optimization
- Teamwork and communication
- Project & Risk Management

- programming: Python , Java , C
-**Web :** Html , Css , JavaScript(react), Xml
-Analytics : PowerBI , Tableau(basic)
-Databases: MySQL , Mongodb
-Hardware : Microprocessor(Arduino), Iot Devices
-Ms office : word , powerpoint , Excel (uptil basic VBcoding)
-Softwares: putty ,mtputty ,winscp, antigravity, github copilot , cyberduck
-IDE's : Google Colab , VScode , Android studio , MySQL workbench , MongoDB , Eclipse , Jupyter notebook

Certifications

Advanced NLP BERT- Infosys Springboard

- Fine-tunning for tasks(Text classification)

Data Analytics(Python , PowerBi , Excel) – Teachnook(wipro verified Dice)

- Learned Dumping datasets from excel and external to sources to powerBI and Excel(lookups , pivot , basic vbcoding)
